Workspace review

A read-only tour of the Mark VI project

Heartbreaker

Desktop chat, file delivery and worker controls.

Igor

Orchestration, memory and authenticated file delivery.

SPEDA Go

Android conversation and worker activity.

Review notes

How the workspace tour was carried out

01 / Discover

List the top-level folders and locate project guides.

02 / Verify

Read package summaries and map the entry points.

03 / Report

Summarize the components and return the findings.
